## 1400 Series

### Classic Detailing Meets State-of-the-Art Engineering

EuroLine's 1400 Series is unsurpassed in energy-saving features and quality of materials. Choose from a wide range of styles and custom accessories to order the perfect window for your particular style and performance requirements.

The 1400 Series features multi-point locking hardware for increased security and weather tightness. Energy-saving features include triple gaskets along with double or triple pane glass units with soft coat LoE and argon to ensure your home stays cozy in winter and cool in summer. With the sturdy dual-arm rotary operator, trouble-free performance is guaranteed – no matter how many times you open and close your window. All of the hardware is rust resistant!

# A BETTER WAY TO SEE YOUR WORLD

## High-quality features and incredible flexibility

The 1400 Series has features you'd only expect to find in more costly casement windows:

- Triple-gasket system with multi-chambered profiles for superior thermal efficiency
- Wide selection of sizes and styles for new and replacement construction
- Fold-away crank mechanisms
- Concealed hinges
- Reinforced frames and sashes
- Maintenance-free vinyl never needs painting. Cleans with soap and water. uPVC won't yellow or become brittle with time
- Multipoint locking hardware for added security and a tighter seal
- Special window frame grooves – 1400 Series window frames come with interior and exterior grooves to make accessory attachment fast and easy (brick moulds, rebate flanges, sill extensions, rain screen adaptors, jamb extensions, drywall insertions etc).

Molded contours inside and out.

### Made of Superior uPVC

The 1400 series of windows is made from uPVC. The process by

Available with a wide range of Eurowood finishes to give the look of wood with the advantages of vinyl.

The appearance of detailed milling matches the look of wood with the practicality of vinyl.

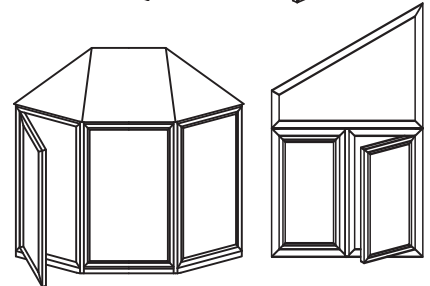

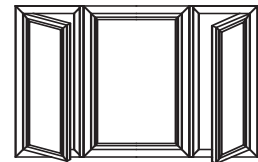

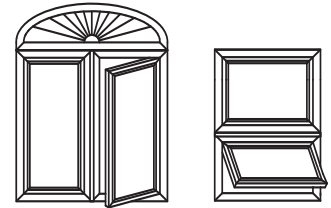

which the uPVC is mixed together makes it stronger and less brittle than other types of PVC. Most importantly, it won't make your family sick. And it's recyclable.

High impact-resistant uPVC is essential during transportation and installation when window frames are subjected to bending, and when they are exposed to low external temperatures in winter. Under these conditions, regular PVC would crack. Cracking is much less likely in uPVC.

uPVC polymers exhibit outstanding light and weather resistance as

well as high color durability. After 10,000 hours of exposure in the Weather-Ometer, no change in color is discernible, the notch impact strength is scarcely altered and there is no visible change in surface gloss.

1400 Series casement, awning and picture windows accommodate a wide variety of architectural shapes and styles.
